

Legacy Pack

“He who has a why to live can bear almost any how”.

South Bucks Hospice seeks to ease the ‘how’ whilst helping our patients to see the ‘why’; to affirm their life through Palliative care. Working from two sites offering Palliative and Lymphoedema care, we offer these patients all possible support, but also extend psychotherapeutic care to their families and carers.

What your legacy will help to achieve

Leaving a legacy to South Bucks Hospice will ensure that we will be able to continue to provide our services free of charge to those in the South Bucks Community. From your kind donation, we will be able to expand our services, ensuring that we touch the lives of many more patients, their families and carers.

By leaving a legacy to a particular service operated by South Bucks Hospice, you could give something back to a service that helped you or a loved one. You could directly contribute to a new piece of clinical equipment, to a nurse’s salary, or directly to one of our departments, such as the department of psychotherapy, physiotherapy, or complementary therapies.

Why is a legacy so important?

Leaving a legacy is a way of making a difference after your passing. It will help us to plan ahead, and start working on major projects, thanks to your kindness. You will be ensuring that you still have an active part in the future of your community even though you have passed away.

It is most suitable for those who are asset rich, as it comes out of your estate. If you were unable to make the contributions you would have liked to during your lifetime, this is a brilliant way of still making a difference.

An ethical commitment to protect your legacy

South Bucks Hospice is committed to protecting and using your legacy in an ethical and legal way depending on your wishes. You can leave us a legacy by amending your will. Please speak to a legal advisor for how to do so.

*Thanks to your donation we will be able to continue to improve our services,
expand our breadth of knowledge and extend our reach.*
